

Challenges:

Optimal Building Solutions specialises in fit-out and refurbishment to all levels of public, commercial & industrial spaces. As a business Optimal Building Solutions aim to provide a cost effective, creative, and innovative solution for the workspace environment.

One sustainability challenge Optimal Building Solutions may face is minimising waste and energy consumption and ultimately protecting the environment. Optimal Building Solutions may also face challenges with material imports during the pandemic.

Impact:

- **Benchmarking Knowledge:** Optimal Building solutions have been able to benchmark their knowledge by completing a self-assessment. The self-assessment was completed with a contract manager so that there was knowledge from different aspects of the business implemented. As a result, Optimal Building solutions explained that the Action Plan received has helped them to focus on & improve skills & knowledge within there organisation and have advised they find the SCSS a productive and effective system to have within there organisation & also within the industry.
- **Implementing best practice:** As a result of completing assessments Optimal Building solutions have set a target for them to re-assess every 4 months. Helping them to improve knowledge across the board and implement best practice.
- **Better meeting client requirements:** Optimal Building solutions explained that they have had a positive response from their clients when they have shared & promoted the work they have been completing within the School.

Value gained:

Optimal Building Solutions has gained value from being a Supply Chain Sustainability School member through:

- **Accessible learning**
- **Increase knowledge on sustainability topics**
- **Broadening skills to allow for new clientele**
- **Increasing brand awareness**

Future Proofing:

Optimal Building Solutions value their membership with the Supply Chain Sustainability School (SCSS) and would like the School to continue the great work.
