

Challenges:

As a specialist sub-contractor and supplier of non-mechanical plant, one of the major challenges that Mabey Hire faced was pulling together everything that they already do around sustainability, tying it to a

common purpose and re-educating people about what sustainability can include (e.g. it's not just recycling, it is also about having an impact in the community etc.) They needed to ensure the fundamentals of sustainability were understood and relate to everyone within the company.

Impact:

- **Internal collaboration** – an internal group from different departments was set up to work together to complete the initial assessments within their profile to ensure balanced and accurate responses.
- **Increased understanding** – thanks to the resources on the School's portal, they were able to upskill the sustainability knowledge of their workforce. All colleagues have the opportunity to use the School to upskill using the available resources and learning opportunities.
- **Benchmarking** - Review the existing activities around sustainability against the UN's sustainable development goals and align priorities.
- **Introducing to Supply Chain** – Mabey hire now has the ability to develop their supply chain through establishing and developing their sustainability knowledge by maximising their understanding and their social values.
- **Development of new Sustainability Strategy**

Value gained:

- **Improved reputation:** Many of their clients and their supply chain are members of the school and having a Gold membership is vitally important to Mabey Hire, helping to collaborate and share ideas and knowledge during projects. This improves their reputation by highlighting that sustainability is a key driver within their business and the projects which we they involved in.
- **Strategy:** From the knowledge they have gained from the School and the resources available, they are currently updating and expanding their sustainability policy to cover all aspects of sustainability, including their people (diversity, wellbeing etc.),
