

## Challenges:

One of the biggest challenges faced by Pasquill is awareness and knowledge of sustainability issues and how all employees can have a positive impact on the business and its sustainable journey. Pasquill hopes that through greater use of learning pathways and a wider engagement with the Supply Chain Sustainability School will help them address this. The company has a strong sustainability agenda around waste, energy and carbon but most importantly its people. While Philip Pointon is the Sustainability Director, Pasquill is committed to ensuring that all colleagues are engaged in the issue. It is ultimately everyone's responsibility.

## Impact:

**Measure understanding:** Especially for those new to the construction industry, the assessments are a great way of gauging one's understanding and training needs.

### Services

Manufacturer of engineered timber products

### About

Pasquill is a manufacturer of engineered timber products, including roof trusses, cassette floors, I-beams and Posi-Joists. They are the UK's largest manufacturer of trussed rafters, with 16 locations nationwide and approximately 400 colleagues. The company supplies to all sectors of the construction industry, including merchants and national house builders.

**Increased awareness:** The action plan was accurate enefits the business by increasing awareness and knowledge in a focused approach.

**Observing progress:** The reassessment is good to see the progress made and the next areas of focus.

**Evaluate understanding:** The e-learning modules are a great resource as they test understanding and focus on areas of improvement.

## Value gained:

**Benchmarking:** Involvement in the Supply Chain Sustainability School has shown how others in the industry are meeting the challenges of sustainability.

**Meeting client requirements:** It has also given a better understanding of client requirements and how to support them to achieve their targets.

**Stakeholder engagement:** It has also allowed greater engagement with clients, for example the recent completion of the Barratts learning pathway or the ongoing data capture with Barratts.

A lot of Pasquill's clients have asked about their School membership and being able to demonstrate active involvement is always received positively.

## Future Proofing:

Pasquill would like to continue to see a mix of online and in-person resources to further encourage engagement with their supply chain.
